Boost America 2.50

The Liberty Boosters Quick Start + Opportunity Guide

Building America's next 250 years one rescued reserve at a time.

This free downloadable guide is a public-facing quick start for families, churches, schools, libraries, makerspaces, senior centers, ethical technology builders, and Liberty Boosters who want a simple way to prevent loss, protect attention, and build safer phones, homes, and zones.

Core truth: The person is not the drain. The person is the reserve.

Start Here: A 10-Second Rescue Reset

1. See it. Name the pressure: screen stress, scam pressure, conflict escalation, missing circuit breaker, or open live wire.
2. Choose it. Pick one safer next step: pause, protect, restore, call for help, document, or move away from the drain.
3. Bank it. Count the tiny win. Now the meter is moving.

Main landing page path

Major path: MyUprightUSA.com - apply, boost, sponsor, host, or help build the next 250 years.

Learning path: MajorLeagueFamily.com/SHU - take the Safer Harbor U class and operator orientation.

Mission path: RescueReserve.org - learn the Rescue Meter and share the basic tools.

TOO MANY LIVE WIRES

Too many connections. Too many risks.

The drain gets loud before people know what to call it. Name the open live wire first.

Warning: Name the Open Live Wire

A live wire is any unprotected pressure point where attention, trust, family safety, data, money, or communication can be drained before anyone names the danger.

RED - SEE IT

Spot the danger without shame.
Examples: too many pings, scam call, phishing text, conflict spiral, phantom bill swarm, legal confusion, screen-feed overload.

GOLD - CHOOSE IT

Pick one small safe action.
Pause. Point. Ask for support. Put the phone down. Verify before paying. Document the signal. Move to a safer path.

GREEN - BANK IT

Keep the win. Save the note.
Share the safer step. Build the reserve. One tiny win becomes a Rescue Credit.

Open Live Wire Affection Line

Your phone loves you. Rescueroos do too.
We love the people caught in the drain. We green-light the rescue path out.
Family. Math. G67. Safer phones, homes, and zones.
From open live wires to shielded pathways. From no signal to Rescue Meter.
Akaw! Rescued my reserve.

The official Rescue Meter

The official Rescue Meter is always a semicircular red-gold-green speedometer-style arc: red EMPTY on the left, gold IN-BETWEEN in the center, green FULL on the right, with a gold needle moving toward full. A vertical red/yellow/green stack is only a Quick Signal Light - never the official gauge.

THE MISSING CIRCUIT BREAKER

⚙️ WORKSHOPPING DATAMINIUMS ⚙️

We identify broken systems, restore focus,
and power the path forward—together.

FROM CHAOS TO CLARITY.
FROM HOPE TO ACTION.

CONTINUE THE MISSION. DEEPEN THE LEARNING.
VISIT THE RESCUE RESERVE YOUTUBE CHANNEL

A public doorway: prevent loss and save lives before the attention trafficking starts.

Dataminiums House: The Public Orientation Map

Dataminiums House is the operating house that organizes the Rescue Reserve world. It keeps the ecosystem visible without making first-contact materials too complicated.

Layer	Plain-language job	Public invitation
Dataminiums	Private data, safer records, family-owned reserve	Protect what matters before it is harvested
Blessed Sheds	Do and Teach, Matthew 5 operations, SHU, 24/7 support	Learn the rescue path and teach it gently
Screen Surf Shops	Local rescue stations, classes, demos, Rescue Meter Zones	Host or attend a safer-screen event
AG67 / Gear 6-7	DIY challenge and maker circuit	Build what did not exist when you needed it
AniMoWins Friends	Blog, podcast, characters, field reports	Turn complex pressure into simple stories and actions

Simple line: One universe. One mission. Protect attention. Build reserve. Win together.

Who This Is For: Tracks 4R5 and 4W5

America 2.50 is built around two sides working together. Tracks 1-2 receive the rescue first. Tracks 3-5 build the rescue infrastructure that serves them.

Track 4R5 1-2: Rescue-Receiving

Track 1: Ghost Party Reserves - children, grandparents, caregivers, pets, relational witnesses, and care-history holders who may be emotionally present but structurally unseen.

Track 2: Signal-First Communicators - AAC users, nonverbal users, seniors under scam pressure, neurodivergent people, overwhelmed children, and people who need pointable or protected communication.

Promise: You do not have to collapse before the signal counts.

Track 4W5 3-5: Rescue-Building

Track 3: Newconomy Builder-Operators - Screen Surf Shop operators, AG67 hosts, SHU guides, and local rescue-station builders.

Track 4: Liberty Booster Alliance - sponsors, churches, libraries, schools, makerspaces, disability organizations, ethical technology partners.

Track 5: Regenerative Justease Facilitators - Dataminiums House builders, Blessed Sheds operators, privacy-reserve facilitators, and system designers.

Together: #Rescuegether

The why: protect people and relationships old systems miss.

The how: build local, teachable, pointable, and faith-friendly rescue infrastructure.

The next step: apply, host, sponsor, teach, test, or share the guide.

Opportunity principle

This guide does not promise employment, income, legal protection, medical outcomes, or guaranteed business results. It invites people to build diversified skills, safety habits, community roles, and local opportunities around personal security, family attention, ethical technology, and loss prevention.

Opportunities to Get Involved and Develop

The next 250 years need practical, diversified skill paths: family technology safety, personal security habits, life-survival skills, community response, ethical data stewardship, and local teaching roles. America 2.50 starts small so people can practice before they operate.

Pathway	What you practice	Who it can help
Family Quick Start Tester	Use the Rescue Meter at home; report what worked	Families, caregivers, teens, grandparents
Digital-Pause Coach	Teach the 10-second See/Choose/Bank reset	Schools, churches, senior groups, families
Screen Surf Shop Host	Run a local demo, workshop, or pop-up station	Libraries, makerspaces, community centers
AG67 Maker / Builder	Prototype physical or digital circuit-breaker tools	Students, engineers, tinkerers, civic builders
Elder Scam Shield Helper	Practice verification, pause scripts, safe reporting	Seniors and families under fraud pressure
Emergency Rescue Data Kit Builder	Organize family documents, contacts, and safe next steps	Households, caregivers, court-impacted families
Sponsor / Liberty Booster	Fund, host, share, or underwrite tools and classes	Tracks 1-2 and local communities

Start simple: do not wait for a perfect program. Practice one family reset, one safer verification step, one tiny data-kit action, or one local teaching conversation.

The missing circuit breaker: from chaos to clarity, from hope to action.

SCENE 8

RESCUE RESERVE™

RESCUE BEGINS WHERE ATTENTION WAS LOST.

You didn't just stop the tug. You chose connection. You reclaimed what matters most.

RESCUE METER RESTORED

ATTENTION. CONNECTION. PROTECTION. FULLY RESTORED.

PAUSE. PROTECT. RESTORE.

SAFER PHONES, HOMES, AND ZONES.

Ride the wave. Choose safe.

TOGETHER, WE HOLD IT TOGETHER.
THANK YOU FOR CHOOSING SAFE.
The wave continues.

Rescue begins where attention was lost: pause, protect, restore.

Screen Surf Shops: ride the wave, choose safe, and help others practice the meter.

PREVENT LOSS AND SAVE LIVES

before the attention trafficking starts.

Prevent loss and save lives before attention trafficking starts.

Boost! Become One of the First 250 Liberty Boosters

America's 250th birthday is a milestone moment. Rescue Reserve is inviting the first 250 New Model Boosters to help build the next 250 years of family-owned, faith-rooted, regenerative technology and community protection.

What Liberty Boosters can help build

- Free Rescue Meter Quick Starts and family reset tools
- Screen Surf Shop pop-ups and workshops
- Safer Harbor U orientation classes
- AG67 / Gear 6-7 maker challenges
- AniMoWins Friends field reports, videos, and educational stories
- Emergency Rescue Data Kit templates
- Local partnerships with churches, libraries, schools, senior centers, and makerspaces

What early boosters may receive

- Recognition at MyUprightUSA.com
- Early orientation for Screen Surf Shop operator opportunities
- Sponsor and naming-rights conversations for local challenges or field reports
- A direct role in testing, improving, and sharing the model
- A way to support Tracks 1-2 through Track 4W5 3-5 building

Important note

Boosters are supporters, builders, hosts, testers, sponsors, and early organizers. This guide is an invitation to participate and develop skills. It is not a guarantee of income, employment, certification, legal status, health outcome, or business success.

Get Started Tonight

This is a doorway, not the whole library. Start with one tiny win and then choose whether to learn, host, sponsor, build, or share.

1. Family Reset

Ask: Where are we right now - red, gold, or green? Choose one 10-second pause. Bank the win.

2. Learn / Share

Visit MajorLeagueFamily.com/SHU for Safer Harbor U. Share this guide with one family, church, library, school, or senior center.

3. Boost / Build

Visit MyUprightUSA.com to apply, sponsor, host, or help build the 250 Liberty Booster pathway.

Sources, Verification, and Safety Notes

Rescue Reserve compiled the figures in this guide from public sources. For grant, press, investor-facing, or highly formal public materials, Rescue Reserve verifies and dates each source before publication.

- Federal Trade Commission. Protecting Older Consumers 2024-2025: A Report of the Federal Trade Commission.
- Federal Bureau of Investigation. Elder Fraud: 2024 IC3 Annual Report.
- Consumer Federation of America. Americans Estimated to Lose \$119 Billion Annually to Online Scams.
- U.S. Census Bureau. Custodial Parents and Their Child Support: 2022 (P60-285).
- Magnetaba; Amra & Elma. Attention span and digital task-switching research, 2024-2026.
- Nature. Pediatric ADHD and anxiety diagnosis trend data, 2016-2022.
- WMXT Law. Grandparent visitation rights and child support enforcement gap analysis.

Safety and scope

This guide is educational and operational. It does not provide legal, medical, financial, cybersecurity, or mental-health advice. For urgent danger, call local emergency services. For legal, medical, financial, or security decisions, consult qualified professionals.

Indicator key: MAJOR = systemic, high-financial, safety, or legal-standing risk. MINOR = daily friction with documented but lower-severity impact. Both are real. Both are worth a rescue.

Together

ATTENTION RESERVES STAY FULL.

- Empty reserves leave you and others exposed.
- Stay aware. Stay prepared. Stay in balance.
- Together, we keep the Rescue Economy strong.

You don't have to talk to be heard.
You don't have to be near to be counted.
Point here. ● That's enough.

THE MISSING CIRCUIT BREAKER

WITHOUT RESCUE METERS,
ATTENTION RESERVES STAY EMPTY.

**OPEN LIVE WIRES.
OPEN STACKS.**

THE RESCUE ECONOMY METER IS MOVING!

YOUR CHOICES
Power it.

FAIR ATTENTION
Earns it.

BALANCED FUTURE
Secures it.

Dataminiums explains how your family's in the same room — but the screens took them somewhere else. Big Tech is built to drain attention and harvest data. Willpower alone can't win. Dataminiums gives faith-led families a simple system to take their home back: name the drains, read your attention with a red-gold-green Rescue Meter, build an Emergency Rescue Data Kit. Twelve short chapters. Real stories. Steps you can start tonight.

**Claim your home.
Rescue your reserve.**
